

ОНЛАЙН-ОБРАЗОВАНИЕ

Нагрузочное тестирование Скрипты и сценарии НТ - 2: Jmeter часть 2/2

Проверить, идет ли запись!

Меня хорошо видно и слышно?

Ставьте ☐, если всё плохо
Напишите в чат, если есть проблемы

Преподаватели урока

Железняков Евгений

- 5 лет опыта в области нагрузочного тестирования
- Организация и проведение НТ в Банках, Телекоме, QSR
- ATP Loadrunner v12
- linkedin.com/in/eszheleznyakov

Правила вебинара

Активно участвуем

Задаем вопрос в чат / голосом в конце блоков-тем

Off-topic обсуждаем в slack #канал группы или #general

Вопросы вижу в чате, отвечаю в конце блоков-тем

План занятия

1. **Ultimate thread group**
2. **Arrival thread group**
3. **Timers for pacing (Throughput shaping, JSR223, Constant throughput)**
4. **Web sockets**
5. **JDBC Connection & Requests**
6. **Testing with different bandwidths**
7. **Sharing data between threads**
8. **Jmeter as Java code deploy as jar**
9. **Develop Jmeter plugins**
10. **Run Jmeter in Docker**
11. **Run Jmeter from K8s**

Цели вебинара | После занятия вы

1

Сможете разрабатывать нагрузочные тесты на Jmeter, запускать их, генерировать отчеты

2

Будете знать основные принципы разработки в gui интерфейсе Jmeter, уметь применять компоненты

3

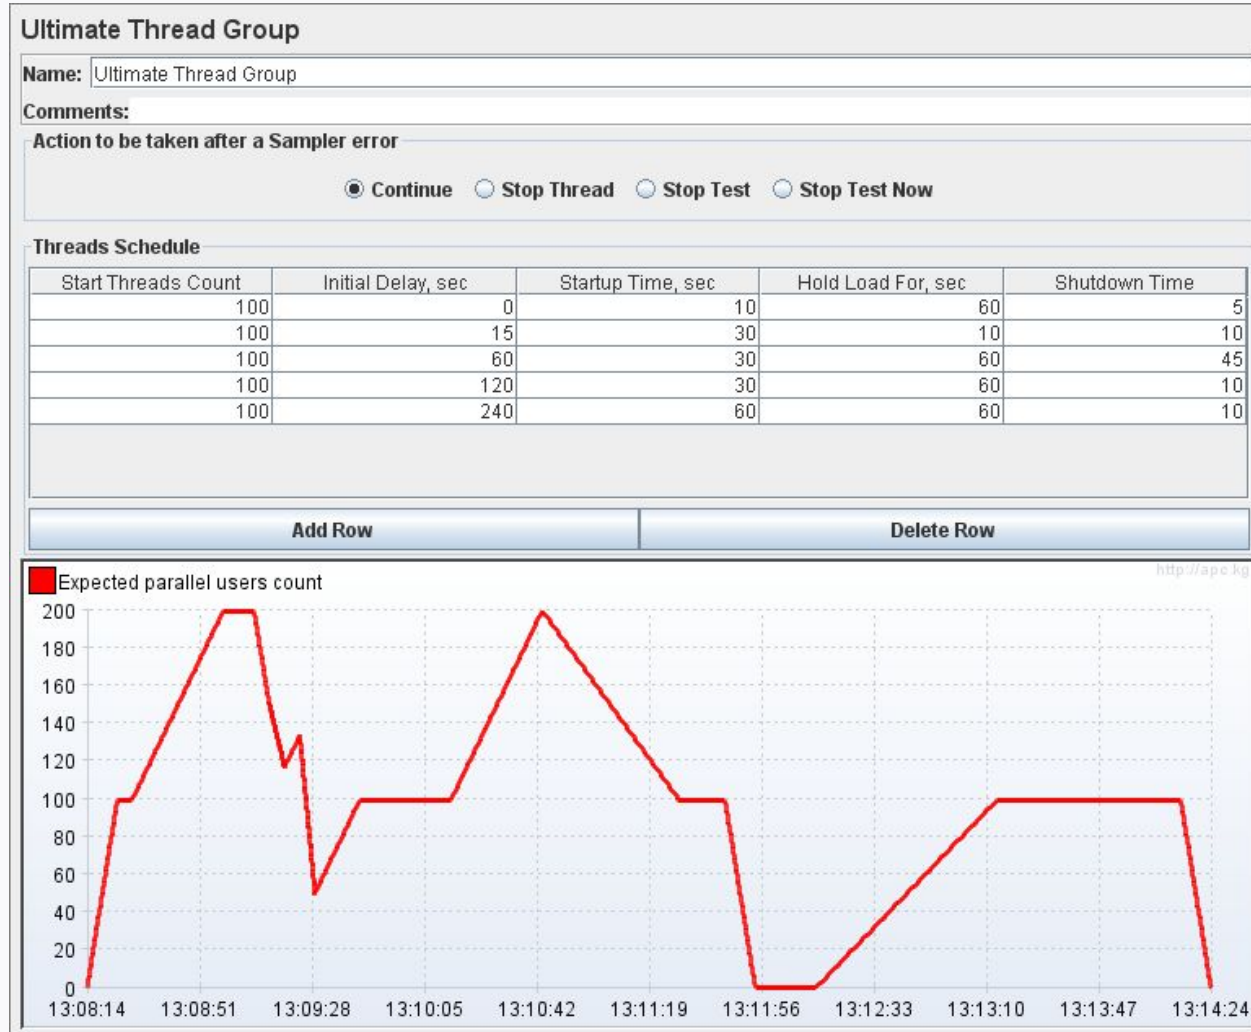

Сформируете фундамент для применения нагрузочного тестирования в своей работе

The background of the image is a high-angle, blue-tinted aerial photograph of a dense urban skyline, likely New York City. The image is overlaid with a semi-transparent blue band across the middle, which features a white network pattern of interconnected dots and lines. The text "Ultimate Thread Group" is centered within this band in a white, italicized serif font.

Ultimate Thread Group

Ultimate thread group

<https://jmeter-plugins.org/wiki/UltimateThreadGroup/>

The image features a high-angle, aerial view of a dense urban skyline, likely New York City, with numerous skyscrapers and buildings. The entire image is overlaid with a semi-transparent blue and teal color scheme. A network of thin, light blue lines connects various points across the image, creating a digital or technological feel. The text "Arrival Thread Group" is centered in the middle of the image, rendered in a white, bold, italicized serif font.

Arrival Thread Group

Arrival thread group

<https://jmeter-plugins.org/wiki/ArrivalsThreadGroup/>

jp@gc - Arrivals Thread Group

Name: jp@gc - Arrivals Thread Group

Comments:

[Help on this plugin](#) v1.4.0

Action to be taken after a Sampler error

☒ Continue ☐ Start Next Thread Loop ☐ Stop Thread ☐ Stop Test ☐ Stop Test Now

Target Rate (arrivals/sec): 12

Ramp Up Time (sec): 60

Ramp-Up Steps Count: 3

Hold Target Rate Time (sec): 120

■ Arrival Rate (~1920 total arrivals)

Elapsed Time	Number of arrivals/min
00:00:00	4
00:18:00	8
00:36:00	12
03:00:00	12

Time Unit: ☒ minutes ☐ seconds

Concurrency Limit: 1000

The background of the slide is a blue-tinted aerial photograph of a dense city skyline, likely New York City. Overlaid on this is a semi-transparent network pattern consisting of numerous small dots connected by thin lines, creating a web-like effect. The text "Timers for pacing" is centered in the middle of the slide in a white, italicized serif font.

Timers for pacing

Timers for pacing

Constant Throughput Timer

Name:

Comments:

Delay before each affected sampler

Target throughput (in samples per minute):

Calculate Throughput based on:

JSR 223 Timer

/Sets the pacing length based on the last requests response time. 4500 is the time in ms

Long pacing = **4500** - prev.getTime();

//If the response time is less than 4500 ms, set the delay value to myDelay

if (pacing > 0)

{

//iPacing is equal to the int value of pacing if pacing is not equal to null, otherwise iPacing is null

Integer iPacing = pacing != **null** ? pacing.intValue() : **null**;

log.info(String.valueOf(iPacing));

vars.put("myDelay", String.valueOf(iPacing));

return iPacing;

}

//The response time is greater than or equal to 4500 ms, set myDelay to 0

else

{

vars.put("myDelay", "0");

return 0;

}

The background of the slide features an aerial view of a city skyline, likely New York City, with numerous skyscrapers. The image is overlaid with a semi-transparent blue layer that contains a network of white lines and dots, resembling a web or data connection. The text "Web Sockets" is centered in a white, bold, sans-serif font.

The image features a blue-tinted aerial view of a city skyline, likely New York City, with numerous skyscrapers. A semi-transparent network pattern of white lines and dots is overlaid on the image, particularly concentrated in the center. The word "Bandwidth" is written in a white, italicized, sans-serif font, centered within the network pattern.

Bandwidth

Bandwidth

- \$JMETER_HOME/bin/user.properties.
- httpclient.socket.http.cps=0
- httpclient.socket.https.cps=0
- jmeter -Jhttpclient.socket.http.cps=21888 -Jhttpclient.socket.https.cps=21888 -t /path/to/your/testplan.jmx

cps = (target bandwidth in kbps * 1024) / 8

GPRS (171 Kbits/second downstream) = 21888

The background of the slide features an aerial view of a city skyline, likely New York City, with numerous skyscrapers. The image is overlaid with a semi-transparent blue layer that contains a network of white lines and dots, resembling a data or communication network. The text "Sharing Data Between Threads" is centered in the middle of the slide in a white, bold, italicized font.

Sharing Data Between Threads

Sharing Data Between Threads

Synchronized вызовы

```
def key_set_add(key_name, key_value) {  
    if (props.get(key_name) == null) {  
        props.put(key_name, new HashSet<String[]>())  
    }  
    synchronized (props.get(key_name)) {  
        props.get(key_name).add(key_value)  
    }  
}
```

Concurrent Типы

JSR-223 с ConcurrentBlockingQueue

The background of the slide is a blue-tinted aerial photograph of a dense city skyline, likely New York City, with numerous skyscrapers. A semi-transparent blue band with a white network pattern of dots and lines runs horizontally across the middle of the image. The text "Jmeter as code" is centered within this band.

Jmeter as code

Jmeter as code

Jmeter - это Java приложение, причем исходники нам доступны. Значит можно работать как с кодом.

Минимальный набор для запуска

1. [StandardJMeterEngine](#) - The main class that which configures the Test Plan and executes it.
2. [HashTree](#) - A special collection that holds Test Plan elements.
3. A minimum of JMeter Controllers necessary to run the test:
 - [TestPlan](#) - The root container for all below plus the place where all test properties can be specified
 - [ThreadGroup](#) - A pool of users to execute the test. A test must have at least one Thread Group with at least one thread and one loop.
 - [LoopController](#) - Since you must have at least one loop, it's essential to have a Loop Controller instance set as a main Sampler controller for a Thread Group.
 - A [Sampler](#) to do the actual work.

Сборку рекомендую делать через Maven

The background of the slide is a high-angle, blue-tinted aerial photograph of a dense urban skyline, likely New York City. Overlaid on this image is a semi-transparent blue band that contains a white network diagram. This diagram consists of numerous small dots connected by thin white lines, creating a web-like structure that spans the width of the slide. The text 'Jmeter Plugins' is centered within this blue band.

Jmeter Plugins

Jmeter Plugins

https://jmeter.apache.org/extending/jmeter_tutorial.pdf

The CustomSampler class extends the **AbstractJavaSamplerClient** class and invokes the testFunction. By overriding the getDefaultParameters function, we can apply default parameters that can be used with the request.

<http://svn.apache.org/repos/asf/jmeter/trunk/src/protocol/java/org/apache/jmeter/protocol/java/test/SleepTest.java>

The background of the image is a high-angle, blue-tinted aerial photograph of a dense urban skyline, likely New York City. Overlaid on this is a semi-transparent blue band that contains a white network diagram of interconnected nodes and lines. Centered within this band is the title text.
